

JOSEPH W. SIMEO, R.A.

Vice President

Summary

Mr. Simeo joined Thornton Tomasetti in 2011 with a diverse background in technical architecture that involves the development and project management for a variety of commercial building types. His portfolio includes new architectural design and renovations. He focuses his expertise on forensic and investigative architecture, restorations and renovations, standard of care and building assessments. Mr. Simeo has served as an expert witness related to cause and origin investigations, water infiltration, and building envelope and construction failures.

Areas of technical expertise
