

# ANITA ASOKAN, R.A., LEED AP BD+C

Principal

## Summary

Anita Asokan joined Thornton Tomasetti in 2006. She has experience in numerous types of forensic architecture, including condition assessments and building envelope investigations. Her litigation support work includes architectural standard of care, accessibility, building envelope and building-code related matters. Anita has testified as an expert for a case involving a building's façade and roof rehabilitation. She also has experience in providing historic preservation services, specializing in exterior envelope work, including masonry restoration, and roof and window replacements for commercial, education and public sector projects. Anita is currently serving the New York City Building Code Review Committee for specialties specific to Construction Requirements and Materials.

## Areas of Technical Expertise

- Society of Indo American Engineers and Architects (SIAEA) 2010-2017

## Select Project Experience

### Building Envelope

**Nassau County Historic Houses**, Nassau Co., NY. Condition assessment for the building interior and exterior, waterproofing, structural and MEP engineering of 11 historic sites throughout the county.

**Rockefeller Apartments**, New York, NY. Restoration of two 12-story landmark art-deco residential buildings including upgrades to windows and façades.

**Yankee Stadium Condition Assessment**, Bronx, NY. Condition assessment of the structural design of the original stadium.

**821 Broadway**, New York, NY. Façade restoration and redevelopment of an 1890s Romanesque revival building.

### Investigation Services

**David Rockefeller Estate**, Pocantico Hills, NY. Condition assessment of the physical plant, mechanical systems and site amenities of 75-acres of land in Westchester County, NY.

**1107 Fifth Avenue**, New York, NY. Line-of-sight condition assessment of the wraparound terraces in the former Marjorie Merriweather Post Hutton Penthouse, to determine the level of privacy at the terraces from a common building gathering space on the upper roof.

**45 East 30th Street**, New York, NY. Condition assessment of the physical plant, mechanical systems and amenities for a quadruplex condominium.

**3030 Park Avenue**, Bridgeport, CT. Assisted buyer in evaluating the condition of the physical plant, mechanical systems and site amenities for these two large residential adult care facilities.

### Forensic Architecture

**Stuyvesant Town-Peter Cooper Village**, New York, NY. Condition assessment of Stuyvesant Town-Peter Cooper Village, an 80-acre complex containing 110 buildings, including utility areas, residential, commercial spaces and parking garages.

## ANITA ASOKAN, R.A., LEED AP BD+C

**River Terminal Development**, South Kearny, NJ. Damage assessment of the façades, roofs and interiors of 23 buildings on three campuses that experienced flood and wind damage from CAT-90 Sandy.

**32 Old Slip**, New York, NY. Investigation of existing facilities to recommend flood protection measures following CAT-90 Sandy, including flood barriers, curtain wall assessment, emergency generator, and high-volume pumps.

**Atria Senior Living Facility, Façade Investigation**, Great Neck, NY. Investigation and documentation of the existing façade waterproofing conditions using probes. Services included corrective measures for the existing façade while the building remained occupied.

**200 Chambers Street**, New York, NY. Structural and architectural investigation of flood damage to a residential building caused by CAT-90 Sandy and repair designs to affected areas.

**117 E. 57th Street**, New York, NY. Assisted owner of a 54th floor penthouse quadruplex condominium unit in reskinning the apartment with the design of a large span glazing system.

### Sworn Testimony

Deposition, Cherokee Condo. Bd. v. Contractor in recovering damages from a general contractor and a designer arising from a façade and roof rehabilitation project where the end product was riddled with construction defects and leaks. February 2016.
