LAUREN MILLMAN, PH.D., P.E.

Associate

Summary

Dr. Lauren Millman joined Thornton Tomasetti in 2013 and currently resides in Fort Lauderdale, Florida. She is a licensed Professional Engineer specializing in forensic structural and materials engineering. Dr. Millman's projects have included litigation support for design and construction defect projects in Florida, New York and New Jersey, demolition sequencing for Rockefeller University's expansion over Franklin D. Roosevelt Drive, and emergency response for many structures in New York City. She has performed protective design engineering for high-profile new and existing structures located in New York and New Orleans. Prior to attending graduate school for her masters and doctorate degrees, Dr. Millman worked for a not-for-profit housing developer building single-family and multi-family homes in the south Florida area. Dr. Millman lectures at the University of Miami co-teaching the course Forensic Engineering and Law.

Areas of Technical Expertise

- Structural Engineering
- Protective Design Engineering
- Material Analysis and Building Envelope Systems

Education

- Ph.D., Civil Engineering, 2013, University of Miami
- M.S., Civil Engineering, 2011, University of Miami
- B.S., Civil Engineering, 2005, University of Florida

Registrations

• Licensed Professional Engineer in CA and FL

Professional Activities

- Adjunct Professor, University of Miami, Department of Civil, Architectural and Environmental Engineering, 2019-present
- Member, American Society of Civil Engineers (ASCE), 2004-present
- Fellow, University of Miami, Coral Gables, FL, 2010-2013
- Research Assistant, University of Miami, National Science Foundation (NSF) Funded Project, BRIDGE: An Exploration into Concrete Surface Preparation Using Dry Ice Bombardment, University of Miami, Coral Gables, FL, 2010-2013
- Mentor, Thornton Tomasetti, Women@TT Mentoring Program, 2021-present

Select Project Experience

Litigation

1515 Sunset, Coral Gables, FL. Investigations into waterproofing, stucco, precast cladding, expansion joints, and concrete shell installations.

Aria, Longboat Key, FL. Investigations into pavers, drains, tiles, waterproofing, stucco and protective coating failures.

3315 Tower Condominium, Miami Beach, FL. Investigations into balcony waterproofing, tile, guardrails, safety glazing and stucco installations.

Campus Gator, Gainesville, FL. Stucco installation issues.

Summer Key, Jacksonville, FL. Stucco installation issues at five 3-story buildings.

Champlain Towers South, Surfside, FL. Investigation into the sudden collapse of the condominium.

3621 South Ocean, Miami, FL. Investigations into windows, sliding glass doors, waterproofing, stucco, tile systems and other building components.

Crescent Riverwalk, Tampa, FL. Peer review of remediation and subsequent partial reconstruction due to parking garage southwest corner settlement.

De Soleil Hotel Balcony, Miami Beach, FL. Designed testing procedure to confirm existing railing was of sufficient structural capacity.

Fireproofing Investigation, Florham Park, NJ. Debonded sprayed fire-resistive material (SFRM) installation issues. Observed in-situ pull-off tests for bond strength and determined validity of testing methods.

One Thousand Ocean Residences, Boca Raton, FL. Issues involved post-tensioned (PT) anchors, driveway, stucco, sunshades, efflorescence, dissimilar materials in contact, coating failures, and wall tile installation.

1

Thornton Tomasetti

LAUREN MILLMAN, PH.D., P.E.

The Ritz-Carlton, Fort Lauderdale, FL. PT anchor inspection and evaluation for remaining service life based on chloride intrusion.

Various Sinkhole Investigations, throughout central Florida. Single-family homes' structural damage and sinkhole activity assessments based on statutes and structural analysis.

Emergency Response

261 Madison Avenue, New York, NY. 30-story office tower with damage to façade and several stories after a 30-ton chiller fell while being replaced. Provided structural stabilization, designed repairs, peer reviewed new chiller dunnage, and performed construction administration.

215 Flatbush Avenue, Brooklyn, NY. Excavations caused significant movement of adjacent structures. Provided condition assessments, stabilizations, repair plans, and monitoring for adjacent mixed-use low-rise buildings.

Structural Engineering and Material Analysis

Plaza of Bal Harbour Residence, Miami Beach, FL. Concrete restoration peer review of ongoing repair work to parking garage, pool deck, and other locations.

New York Aquarium, Shark Exhibit, Bronx, NY. Site support, including concrete inspection and engineering review for a multi-level concrete structure with tanks to house a shark exhibit.

1 Seventh Avenue, New York, NY. Structural analysis of temporary construction fence. Provided a detailed review and recommendation for strengthening the structure.

Henry Hudson Bridge Skewbacks, New York, NY. Structural design and analysis for rehabilitation of skewbacks, viaduct piers and lower-level north abutment for the bridge built in 1937.

NYU Kimmel, New York, NY. Peer review and inspection of the construction hoist towers at the Kimmel Pavilion. Performed structural analysis that included modeling of the structure.

Demolition Sequencing

Rockefeller University Expansion Demolition, New York, NY. Expansion over Franklin D. Roosevelt (FDR) Drive. Buildings and perimeter wall were constructed in 1914, 1928 and 1982. Engineered temporary construction and final supports for wall penetrations to connect modular additions over FDR Drive.

Protective Design

Hudson Yards Platform, New York, NY. Structural strengthening design of the platform that bridges the Long Island Railroad (LIRR), and which supports apartment, office and retail space.

30 Hudson Yards, New York, NY. Structural strengthening design of 90-story, supertall office tower with podium and open-air observation deck. Footprint is located over the LIRR.

Dixie Brewery Research Building, New Orleans, LA. Renovation of a 1907 brewery into an advanced research facility. Strengthened existing brick facade.
